

Showcase Your Company's Casting Successes

Participate in the 19th Annual Casting Competition

The AFS/*Metal Casting Design & Purchasing* 2019 Casting Competition is your chance to show the engineering and purchasing community what a metal casting can accomplish. Beyond the company recognition and industry public relations gained through the “best-in-class” castings, all entries will appear in *Metal Casting Design & Purchasing* magazine’s “Castings in Action” and “Casting Innovations” departments. Also, this year’s winners will be showcased at Cast in North America at CastExpo.

Eligibility: Participation is open to all North American metalcasters and designers/users of metal castings. Previous entries may be resubmitted. Castings are sought in all metals, casting processes, end-use applications and sizes/weights.

Fees: The competition is **free** for AFS Corporate Member companies. For non-Corporate Member firms, a \$75 fee is required, per entry. (Make checks payable to: AFS 2019 Casting Competition.)

This year, winners will be broken out into all-new categories, with an all-around Casting of the Year winner still chosen. The new categories will be:

1. Newcomer (Rookie of the Year)

This award will go to a company that has not submitted a casting in the last 10 years. Don't be intimidated to enter the contest and show your stuff.

2. Best Example of a Casting Conversion

This award will recognize companies that used metalcasting's strengths to convert a product from a non-casting process.

3. Achievement in a Small Foundry Business

Not every foundry has armies of staff. Smaller facilities are doing great work, and they are a key part of the industry.

This will reward companies that are doing more with fewer workers.

4. Best Innovation/Prototype

The metalcasting industry continues to evolve and stride into the future. That's partly because metalcasters are always stretching capabilities and looking for newer and better. This category is for castings that might not be ready for full production but could be the precursor to the next big thing.

Deadline: January 31, 2019. Please complete the form below (with any supplemental information) and send it, along with the casting, to: Casting Competition'18, 1695 N. Penny Ln., Schaumburg, IL 60173-4555.

Castings may be used for trade show exhibits and permanent displays at AFS, and their images may be used in future AFS publications. Castings can be returned at the entrant's expense.

For information on the competition, contact *Metal Casting Design & Purchasing's* Brian Sandalow at 800/537-4237 or bsandalow@afsinc.org. Information also is available online at www.metalcastingdesign.com.

AFS Casting Competition Entry Form (Deadline: January 31, 2019)

Metalcasting Facility: _____

How Many Employees: _____ Is This Your First Time Submitting an entry: _____

Address: _____

City/State: _____ Phone: _____

E-mail: _____ Contact: _____

Name of Component: _____
