C.2. Manual Review and Revision

The ISO Coordinator or Associate has the authority to issue and approve revisions of this manual. The manual will be reviewed at least annually in a manner selected by the ISO Coordinator. The requirements outlined in Section @@ govern the format and change/modification procedure for this manual.

Changes made to individual pages do not require reissue of the entire section. Each page will note the latest revision date. Changes will be identified by an (*) in the left hand margin. Hand written changes or updates are not permitted except in emergencies and only with the authorization of the ISO Coordinator. Dates and initials are required adjacent to those changes. Any suggestions for changes or modifications should be sent to the ISO Coordinator.

The ISO Coordinator sends out proposed changes for review to the ISO Implementation Committee and they will assess the effect, if any, these changes may have on their quality systems. Any change to this manual that affects the Quality System will be communicated back to the ISO Coordinator for resolution.

Identification of controlled and uncontrolled/obsolete documents may be found in @@@@
Section @@

D. TECHNIKON, LLC HISTORY

TECHNIKON, LLC was formed in 2000 to continue the research programs of two Cooperative Research and Development Agreements (CRADAs): the Casting Emission Reduction Program (CERP), and the American Industry/Government Emissions Research program (AIGER)

The Casting Emission Reduction Program was established to evaluate ways to reduce air emissions from foundry processes so the American metal casting industry can continue to deliver quality products while meeting clean air standards. The concept for CERP originated in 1994 as a collaborative effort between the private sector and the federal government. Parties to this agreement include U.S. automakers under the auspices of the U.S. Council for Automotive Research (USCAR) and the Department of Defense. Other CRADA partners directly supporting the project include: The American Foundry Society (AFS), the Casting Industry Suppliers Association (CISA), the US Environmental Protection Agency (USEPA), and the California Air Resources Board (CARB). CERP has developed or improved foundry processes and materials that allow the United States casting industry to remain competitive while working to achieve a near zero effect on the environment.

The AIGER program was started in 1992. The purpose of AIGER is to identify, encourage, evaluate, and develop the instrumentation and techniques needed to meet the requirements of the Federal Clean Air Act and California Health and Safety Code. Members of the AIGER consortium include the U.S. Environmental Protection Agency (U.S. EPA), the California Air Resources Board (CARB), and USCARs Environmental Research Council (ERC). The mission of the AIGER program is to standardize mobile emissions measurement equipment, diagnostics, and procedures.

The CERP and AIGER CRADAs were combined under a single program manager in 1994. This consolidated management continued until July 2000 when the CRADA was transferred to the Army as part of the McClellan Air Force Base closure. Since then the AIGER CRADA has been abandoned and CERP program management transferred to the Environmental Technology Division (ETD), US Army, ARDEC, Picatinny, New Jersey. TECHNIKON, LLC continues to operate the CERP as well as conduct contract research and testing on a commercial basis.

E. INTRODUCTION

This manual defines TECHNIKON, LLC 's management policies with regard to the application of quality systems in all areas and activities having an influence on quality of services and customer satisfaction.

This manual is a reference document outlining the policies of TECHNIKON, LLC and references to TECHNIKON, LLC 's controlled procedures that comply with the ISO-9001:2000 standard. The specific ISO-9001:2000 components are referenced in the column directly to the right of the quality statements in this manual.

Individual procedure reference numbers are quoted within the body of the quality manual and references will be made to areas where the procedures or records are located. (Also, refer to the Index located in Appendix I of this manual). This permits the revision of procedures in various work groups of TECHNIKON, LLC independent of the Quality Manual.

The Quality Manual and procedures of various work groups may contain specific procedures and references that are proprietary and, therefore, considered **Confidential**. Access to these documents will be granted only when authorized by the TECHNIKON, LLC President, Vice President, or the ISO Coordinator.

The "Scope of Registration" encompasses provision of a service of environmental research and laboratory testing including contract design of processes for chemical related industries.

The functions of the Quality Manual are therefore to:

- Define TECHNIKON, LLC 's policies regarding quality in a form directly related to ISO-9001-2000 and equivalent standards.
- Identify and reference the procedures and records that affect quality. Refer to Index located in Appendix I for specific records by TECHNIKON, LLC group.
- Act as the reference document for purposes of audit, management review and external assessment of TECHNIKON, LLC 's quality program.

- Controlled documents will be reviewed and approved by authorized personnel prior to issuance.
- Review and update as necessary. Handwritten changes are not allowed except in emergencies and with proper authorization by the ISO Coordinator. Dates and initials are required adjacent to changes.
- Identify the current revision status.
- Ensure availability and legibility of current documents. The most recent version of appropriate documents will be available at work locations.
- Identify and control documents of external origin. Uncontrolled documents shall not be used within the Quality System except for training, distribution to customers, and draft revisions.
- Prevent the use of obsolete documents through careful identification. All obsolete documents will be promptly removed.

The Document Control System is described in the Critical Procedures Manual, "Document Control" Document No. CPMXXX

Documents may be in either paper or electronic form.

Procedures are available for controlling revisions. (See Critical Procedure CPM,@@ Document Control). All revisions must also be approved by the ISO Coordinator or Associate.

The document itself must indicate its issue date as well as the date of the previous issue.

Additional information can be found in the Critical Procedures Manual, "Document Control" Document No. @@@@ and in each TECHNIKON, LLC Department's Procedures Manual.

G.7.6 Control of Quality Records

It is TECHNIKON, LLC's policy to establish and maintain procedures for the identification, collection, filing, storage, maintenance, and distribution of quality records. Quality records are used to document the effective operation of the quality management system and to provide for identification and tracking of events and materials leading to the quality of the finished product.

<p>J.5 Measurement and Monitoring</p> <p>J.5.1 Customer Satisfaction</p> <p>TECHNIKON, LLC will monitor, according to predetermined methodologies, information on customer satisfaction/dissatisfaction as a means to measure the performance of the Quality Management System.</p> <p>J.5.2 Internal Audits</p> <p>It is the responsibility of the ISO Coordinator to ensure that internal audits are scheduled, carried out, and documented, and that any necessary corrective action is successfully completed. Audits will be scheduled to access all of the TECHNIKON, LLC operations at least annually to determine whether quality activities comply with the quality plan.</p> <p>Employees trained to perform internal auditing, and not having direct responsibility in the areas being audited carry out the quality audits.</p> <p>The results of all audits are documented and brought to the attention of the TECHNIKON, LLC President and ISO Implementation Committee (see Section C.1)</p> <p>Any necessary corrective actions are reviewed, in a timely fashion, with the personnel having responsibility in the audited area. Follow-up action, including re-audit of deficient areas, will be taken where indicated. Corrective and follow-up actions will be appropriately verified and documented.</p> <p>Refer to Critical Procedures Manual, “Internal Auditing”, Document No. CPM@@@ for the procedure for internal quality audits.</p> <p>J.5.3 Measurement and Monitoring of Processes</p> <p>Each department within TECHNIKON, LLC shall identify and plan the servicing processes that directly affect quality. These processes will be found in individual department policies and procedures manuals and are to cover such items as (but not limited to) equipment maintenance, personnel training, work instructions, standard methods and calibration procedures. Realization processes necessary to</p>	<p>ISO-9001:2000 REFERENCE</p> <p>8.2.1</p> <p>8.2.2</p> <p>8.2.3</p>
